KEY PROJECTS

Kutchi I.T.I. - Online Examination & Institute Management System

Kutchi Indian Technical Institute | Client Project | Educational Web Application

Duration: 3 Months

Technologies: HTML, CSS, Bootstrap v5.3, JavaScript, PHP, MySQL

- Developed a secure role-based online examination system for student registration, faculty approval, exam scheduling, hall tickets, mock/final exams, evaluation, results, and feedback workflows.
- Implemented Role-Based Access Control (RBAC) with dedicated dashboards and permissions for Student, Faculty, Admin, Invigilator, and Super Admin users.
- Added exam integrity controls including timer, tab-switch detection, full-screen exit tracking, copy-paste/right-click blocking, raise-hand alerts, pause/resume control, and invigilator warnings.
- Built admin and faculty workflows for question management, paper assignment, student validation, evaluation acknowledgment, result declaration, audit logs, and data backup.
- Added student features such as mock test practice, result tracking, provisional certificate download, avatar/photo upload, and QR-based mobile photo upload support.
- Worked on security-focused implementation including password hashing, session security, file upload validation, role enforcement, audit logging, and data backup support.

Riri Nails Oman – Dynamic Website & Appointment Booking Platform

Collaborative Client Project | Frontend Development, SEO & UI Implementation

Duration: 2.5 Months

Client Preview Completed | Final Domain Deployment in Progress

Technologies: HTML, CSS, JavaScript, Bootstrap, GSAP, ASP.NET Core Web API, SQL Database

- Developed the responsive frontend website for Riri Nails Oman with service presentation, portfolio/gallery, FAQ, testimonials, blog-style content, and client-focused landing page sections.
- Built a multi-step appointment booking interface covering service selection, staff selection, date/time slot selection, booking confirmation, payment instructions, and booking ID flow.
- Implemented SEO setup including meta titles, meta descriptions, canonical tags, Open Graph, Twitter Cards, schema markup, breadcrumb structured data, image alt attributes, and SEO-friendly heading structure.
- Worked on SEO content writing, service descriptions, website copy, CTA content, image optimization, responsive layouts, GSAP animations, and visual hierarchy for better business presentation and search visibility.
- Implemented JSON-based Arabic multilingual content handling, deployed the frontend preview on Netlify, and collaborated with a backend developer for booking, authentication, payment proof, and admin workflow requirements.

The King's Tailor & Drapers – RBAC-Based Multilingual Website & CMS Platform

Client Project | Frontend Architecture, CMS UI & Planned Full Stack Development

Duration: Ongoing

Status: UI & CMS Prototype Completed | Backend Integration in Progress

Technologies: HTML, CSS, JavaScript, Bootstrap, GSAP | Planned Backend: PHP, MySQL

- Designed and developed a luxury tailoring web application with marketing pages, service pages, gallery, portfolio, blogs, contact pages, user dashboard, utility pages, and custom error pages.
- Built an RBAC-based CMS interface for Super Admin, Admin, Content Writer, Legal Department, and User roles with dedicated dashboards and permission-based workflows.
- Created admin controls for dynamic page content, SEO metadata, canonical links, schema markup, media library, theme settings, dark/light mode, and multilingual content management.
- Implemented a multilingual content workflow with language tabs, import/export translation files, and dynamic content switching across Hindi, Marathi, Gujarati, Punjabi, Urdu, and Arabic.
- Designed user dashboard features for profile management, suit measurement inputs, order history, invoice access, account settings, notifications, and dark/light mode preferences.
- Followed a modular frontend architecture using semantic HTML, section-wise CSS/JS, reusable layouts, ARIA labels, responsive design, and GSAP-based UI interactions.

ADDITIONAL CLIENT PROJECTS
